in style : . title - info { font - weight: bold}

. footer :{ font - style: italic }

selector   attribute

stuff | stuff |

. container { display : flex; }

{ by default: horizontal
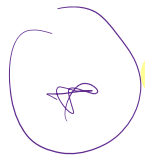

stuff |

stuff |

stuff |

justify - content: space { between around evenly / video on

flex - start #left
      end #right   Part 2.02

① align - items: | baseline;
                 | flex - start
                 | end
                 | center : vertical center
                 | stretch : stretch to fit the container

② flex - direction : row   : same as the text direction
                     row- reverse : opposit ———
                     column   : placed top to bottom
   column reverse : bottom to top

③ order = start (-2; -1; 0; 1; 2)

#pond & display = flex; }

- yellow & order = 2; }

~ red { order : -4 ; }

(1) align-self : same values as align-items
and values for the specific item

(2) flex - wrap :

nowrap : fits to a single line
wrap : wrap around to additional lines
wrap - reverse : wrap around to additional line in reverse

⊗ ==flex - flow== : combi of flex - direction,

flex - wrap

Ex; flex - flow: row - wrap

✗ ==align - content?==

flex - {start
         end

center
space {between
       around

stretch
